

Looking for cost effective IBM mainframe connectivity software with outstanding support?

When companies require secure access to their corporate data, they look to QWS3270 Secure for their solution. QWS3270 Secure provides, cost effective, secure TN3270 mainframe connectivity. Prices start at \$70.00 US/License.

Service out of this world.

Support is an integral part of your corporate availability. That's why we staff our support line with knowledgeable programmers who get to the root of your problem quickly. We offer support in two different ways:

- 1) 45 day no-charge technical support.
- 2) Software Maintenance, with unlimited technical support via telephone and Email — plus 1 year of upgrade protection for your software. Billed annually — at a rate of 15% of the selling price of our software.

Security – Do you know who's looking at your data?

Jolly Giant Software Inc. (JGS) understands the requirement to protect access to your critical, corporate data. Therefore we use Secure Sockets Layer (SSL) to encrypt your data. This allows your employees, business partners and your customers, inside and outside your firewall, to get controlled access to your corporate data. We have partnered with Baltimore Technologies to develop our secure solution, to meet your business needs.

Performance — Getting the job done in less time.

We at JGS believe that performance, reliability and cost containment are critical to your business success. QWS3270 Secure has been modeled on our very successful QWS3270 PLUS product. QWS3270 PLUS has demonstrated its reliability as our customers have purchased over 400,000 copies to date. Our prices are about half of our major competitor, allowing you to implement a very cost effective solution.

QWS3270 Secure is fast.

Loads and connects in seconds.

QWS3270 Secure is compact.

< 1MB of RAM / Session.
< 3MB of Fixed Disk Space.

QWS3270 Secure installs in about a minute.

In fact the only questions that the users are asked are:

- 1) What language do you want?
- 2) What is the address of the mainframe you wish to connect to?

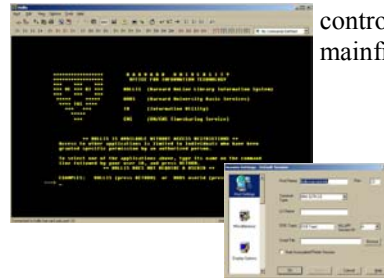

QWS3270 Secure downloads is less time, than it takes to get a coffee.

Would you believe it takes less than 3 minutes to download at 56K.

Jolly customers.

Many of today's Fortune 500 customers use and happily recommend QWS3270 PLUS to provide access to their mainframe corporate data. QWS3270 Secure builds on this

reliability and adds secure, controlled access to your mainframe.
